

HIDDEN LAKE AMENITY CENTER

Youngsville, NC

USE Clubhouse
SERVICES Interior Design, Procurement Management

The Hidden Lake Amenity Center is the anchor building for a residential development. The team provided interior design services including coordination and consultation with the developer and architect. The team was instrumental in the selection of all interior finishes, layout, specifications and selection of all interior lighting, design of all custom millwork including the site topography table and all marketing kiosks which display information for the development. The team also selected, procured and installed all furnishings including furniture, area rugs, accessories and artwork. The design concept was based on an Adirondack lake house style which emphasizes warm rich tones, stone, dark wood in a casual, yet upscale environment.
